Rio Tinto Yarwun Alumina Refinery

CLIENT
Rio Tinto

LOCATION
Gladstone, QLD

TIMEFRAME
12 month hire

SIZE
1 module

Rio Tinto's Yarwun Alumina Refinery team contacted their local Ausco Modular branch in Gladstone to quickly mobilise an additional temporary building to assist in a shutdown project. Within a week, Ausco's team had the required building prepared and delivered to site, ensuring the customer's tight timeframe was met.

This stellar effort did not go unnoticed by Rio Tinto and they shared their thanks with Ausco, along with other suppliers who contributed, for keeping their project on time and assisting when needed.

"..the Major Outages team wish to thank everyone who has assisted in the mobilisation of an additional building required for the Boiler/Digestion shutdown village.

The additional building was required at short notice for the HRSG shutdown and the collaboration, communication and prompt action by all stakeholders ensured the building landed without any issues.

The overall combined effort made for a 100% seamless mobilisation of this much needed building."
