

## Hera-Nymagee Mine

CLIENT  
Aurelia Metals

LOCATION  
Central NSW

NUMBER OF BEDS  
80-bed camp

The Hera-Nymagee underground mine is located approximately 100km south-east of Cobar, central New South Wales. The project involves the development of the Hera gold base metal deposit and the Nymagee copper deposit. The Hera deposit commenced the first production in September 2014.

Ausco provided an 80-bed mining camp for the Hera mine in 2013, which included accommodation, laundry, gym, kitchen and recreation room.

Aurelia Metals have expanded this camp to support the development of a new satellite mining operation.

In 2021 we were commissioned to build, transport and install stage 2, which consists of 16 modules for accommodation and a new laundry. The ensuite accommodation sleeps one person and includes storage space, air-conditioning and a TV. Ausco also built large, covered decks that make it easy for staff to move around and offer necessary shade.

Pictured is Brett Logan (right) from Aurelia Metals who visited the Ausco Riverview branch to view the modules and verandahs prior to transportation to the site.
