Try our Eco Upgrades

Ausco's range of RCLG-compliant, ECO Upgrades takes the guesswork out of compliance.

ECO Upgrades come standard with:

- Low VOC paint, adhesives and sealants
- Insulation
- LED lighting with motion sensors
- Blinds or tints
- Weather seals
- Water saving taps
- Hired, reusable furniture

With more options to suit your site and sustainability requirements.

Reuse and Recycle

We continually reuse existing modules during their lifecycle, with refurbishment further extending their life without compromising on quality or performance.

At the end of their useful economic life, modules are either sold to further extend their lives or dismantled into components, with up to 96% of material recyclable. Ausco's long-term goal is to retain the value of materials and resources indefinitely, with no residual waste at all.

Ausco's ESG Strategy

Key principles for our ESG strategy are:

- Loops within loops: Creating circularity of product and business
- Sustainable infrastructure: Space as a service for where and when you need it
- Operational excellence: Functioning efficiently and safely
- Leading frameworks: Shaped and guided by UN Sustainable Development Goals.

ESG Goals and Initiatives

These goals will be achieved by initiatives such as:

- Efficiency audits
- Utilising solar
- LED lights
- Reductions in fuel use on site
- Use of rainwater tanks
- Optimising vehicle use and offering electric or hybrid fleet vehicles
- Branches participating in volunteering initiatives around Australia
